

NGUYEN QUANG TUAN

- Cau Giay, Ha Noi
- 03 / 03 / 2004

- ngtuan.code@gmail.com
- (+84) 946-837-636

CAREER OBJECTIVE

AI Engineer with hands-on experience in NLP pipelines, model fine-tuning, and MLOps practices. Seeking to apply research-backed AI solutions to real-world Business operations, focusing on system architecture design and performance optimization. Eager to contribute to impactful projects and grow into a technical expert

EDUCATION

- **University of Engineering and Technology, VNU-Hanoi UET - VNU** (10/2022 - 06/2026)
Computer Science: 3.53 / 4.0
- **Tong Van Tran I High School** (09/2019 - 07/2022)
Mathematics, Physics, Chemistry: 28.5 / 30 (Top 3)

AWARDS/ SCHOLARSHIPS

- Academic encouragement scholarships for 5, 6th academic semesters
- Third prize in the Provincial Physics Olympiad 2019

PUBLICATIONS

- **Hybrid NLP Pipeline for Zero-shot Vietnamese Multi-Label Text Classification.** (Under review - 07/2026)
 - Submitted to the 18th International Conference on Knowledge and Systems Engineering (KSE)

EXPERIENCE

- **Viettel AI - AI Software Engineer** (09/2025 – 07/2026)
 - Developed frontend workflows for bot configuration and orchestration, supporting the design and operation of conversational AI systems.
 - Integrated OCR models (PaddleOCR, HunyuanOCR) and contributed to building evaluation benchmarks for performance comparison in real-world scenarios.
 - Designed and implemented backend components including Elasticsearch-based search optimization, chatbot memory, and citation mechanisms to improve retrieval speed and response traceability.
 - Contributed to agent skill development for automated report generation from enterprise documents
 - Proposed a text classification pipeline to improve information retrieval efficiency; awarded Third Prize in internal innovation competition.
- **SOPEN - Software Enginee** (01/2025 – 08/2025)
 - Participated in developing a digital signature mini application, collaborating with the team to implement and maintain signing-related features.
 - Developed and enhanced features for a scheduling and event management system on Viettel Digital Workspace, supporting event planning, task tracking, and user coordination.

UET Laboratory: Software Engineer Lab, UET x Toshiba**(03/2025 – 07/2025)**

- Participated in the development process, combining and prioritizing outputs from multiple DAST tools to support the identification of critical vulnerabilities and eliminate false positives.
- Developed a unified pipeline to consolidate multi-DAST results into SARIF, with normalized severity levels and consistent vulnerability classification.

UET Laboratory: UET NLP Laboratory, UET x GHTK**(09/2024 - 01/2025)**

- Data preprocessing and cleaning
- Participated in fine-tuning BERT models: XLM-RoBERTa, PhoBERT for NER tasks

PROJECTS

Thesis: Cost-Efficient AI Pipeline for Multi-label Text Classification**(09/2025 - 05/2026)**

- Built a 3-stage NLP pipeline (TextRank summarization → KeyBERT keyphrase extraction → Gemini labeling) for unsupervised multi-label classification on Vietnamese news articles.
- Applied asymmetric embedding for semantic keyphrase-document retrieval, while optimizing LLM usage and processing time for cost-efficient, production-ready NLP systems.

Image-to-Vietnamese PDF Converter**(3/2025 – 4/2025)***Node.js, Express.js, RabbitMQ, Tesseract OCR, Redis*

- Built service to extract text from English images, translate to Vietnamese, and generate PDFs.
- Optimized pipeline with design patterns (Cache-Aside, Pipes & Filters) and async task handling with RabbitMQ + Redis caching.

Q-Airlines – Airline Booking Website**(10/2024 – 12/2024)***React.js, Spring Boot, MySQL*

- Created booking site with REST APIs, JWT-secured backend, and admin dashboard.
- Implemented PDF ticket generation with Flying-Saucer library.

Musible – Social Music Android App**(10/2024 – 12/2024)***Kotlin, Jetpack Compose, Firebase, Deezer API*

- Led core Android features with MVVM, Hilt, Coroutines.
- Added real-time chat & group listening with Firebase, integrated Deezer API & AI-based music source separation.
- Set up CI/CD pipeline with GitHub Actions for automated testing

SKILLS

Technical (Basic Experience):

- Languages: Java, Python, Go, Kotlin, JavaScript, HTML/CSS, SQL, C++
- Frameworks & Libraries: Spring Boot, Express.js, React.js, Langchain/LangGraph, Jetpack Compose
- Databases & Messaging: MySQL, Firebase, RabbitMQ, Redis, OpenSearch, Qdrant VectorDB
- Tools & Platforms: Git, OWASP ZAP, Wapiti (Security Testing), JMeter (Performance & Load Testing)

Language:

- English (B2 Level)
